

Dear Friend and Innovation Judge

Welcome to the 2024 Light Ventures 2024 Innovation Workshop! Thank you for generously sharing your afternoon with our student innovators attending today. Together, we are making an impactful investment in empowering the next generation of idea generators, innovators, and entrepreneurs.

Life's events and what appear to be chance encounters often carry deeper significance and reflect a greater purpose. We greatly appreciate your participation today as we believe your interactions and influence will create lasting value. Consider the people and mentors who inspired you, took a genuine interest in you, or encouraged you along the way. What did they do to inspire you to innovate, and persevere? Over the course of the afternoon, be conscious of each student who stands out and impresses you. As the event unfolds, we encourage you to fully engage and give careful and deliberate attention to their needs. Provide the students with constructive feedback and inspiration similar to what contributed to your own personal experience and development.

“Faith is the substance of things hoped for and evidence of things not see.” Hebrews 11:1

“We should be glad of an opportunity to serve others by any invention of ours; and this we should do freely and generously.” - Benjamin Franklin

Your lifetime of experience and hard-won wisdom are what will make your input exceptional. Distribute your gifts of experience and wisdom freely and generously! Thank you for making this significant investment.

Cheers!

Light Ventures and PLNU Innovation Team
